

Multiplication Facts

Timed Multiplication Tests
Multiply By Numbers 0 - 12

**MEGA
BUNDLE**
130 PAGES!

- Multiplication tests for numbers zero through twelve
 - Five bonus mixed review sheets
 - Score and time recording box
- Five versions of each number – 65 tests total!
 - Includes answer key for all sets

TEACH

PRODUCT OVERVIEW

Multiplication timed tests are a great way for students to practice fact fluency. Multiplication fluency is an important skill that will ultimately help students with higher-order mathematical concepts. Although the Common Core places a large emphasis on understanding patterns and strategies, the eventual goal is fact automaticity. According to the Common Core, students should "by the end of grade 3, know from memory all products of two one-digit numbers." And yet, many 4th and 5th graders still struggle to quickly recall basic multiplication facts, which has led to struggles with expanding their application of more complicated mathematics.

The multiplication tests included in this product can help your students achieve success with fact fluency and automaticity. There are five versions of each test with 100 problems on each page. There is also a place on each page for students to record their score and time. Additionally, each test also includes an answer key for easy grading.

Aligns with the following Common Core State Standard:

CCSS.MATH.CONTENT.3.OA.C.7

Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.
